Subject: The USA can't sell out to Microsoft...!

To whom it concerns:

I'm a network administrator in Atlanta, GA. Microsoft has been bastardizing my industry in ways too numerous to mention. From changing industry standards (and forcing thier adoption with thier monopoly of the Desktop PC) to forcing companies out of business by integrating features into their [undeniably dominant] operating system.

I am starkly opposed to the current proposed Microsoft remedies.

I have been plagued with bug-ridden software from Microsoft and I can not escape thier grasp of my industry. If I had an option, I would certainly excise it. Please weigh the potential damage that will result if such a meaningless remedy is handed to Microsoft and Bill Gates. I can't help but think back to the Blackrock empire of old; and how my government avoided corruption and did the right thing and paved the way for REAL American progress.

Please don't allow Microsoft or Bill Gates to line the pockets of my representatives, and please see to it that an appropriate remedy gets forced upon Microsoft. They have been found GUILTY by US LAW, and I demand an appropriate punishment.

Please don't sell our country out.

Sincerely,
Christopher M. Bergeron
